## EDUCATION

---

University of California, Riverside

10/2014 - 06/2018

Business Administration, Information Systems Concentration (B.S)

## EXPERIENCE

---

Software Engineer

01/2022 - 05/2023

Remento - Culver City, Ca

- Technologies: TypeScript, HTML, CSS, React Native, Next.js, Node.js, Express.js, Firebase
- Contributed to multiple codebases (mobile app and three web apps) as one of four software engineers and sole full-time engineer, building front-end and back-end features in a fast-paced startup.
- Developed front-end services and APIs that seamlessly integrated with key third-party software, enabling crucial business decision-making processes. This included the implementation of analytics tools (Segment), AB testing tools (Hotjar), customer service solutions (Intercom), and error monitoring systems (Sentry).
- Led the strategic decision-making process for the selection of technologies and the overall architecture of several production-level Next.js web apps. Notable projects include Async Recording V1, Async Recording V2, and AI Guided Conversation.

Frontend Web Developer

08/2019 - 01/2022

Modern Campus - Camarillo, Ca

- Technologies: JavaScript, HTML, CSS, jQuery, Backbone.js
- Collaborated with cross-functional teams, including front-end and back-end developers, QA engineers, and a UI/UX designer, to deliver on the V11 UI Refresh project, which completely redesigned Modern Campus's Content Management System (OmniCMS), with a strong emphasis on accessibility.
- Led the front-end development of the Personalization team, a feature that empowers clients to create personalized content for site visitors. In this role, I oversaw task delegation, made critical architectural decisions, and provided support to less experienced front-end engineers, helping them overcome any obstacles they encountered.
- Designed and implemented crucial features within the Personalization module. These features include the onboarding flow, personalized content preview functionality, and the Personalization content management page.

Full Stack Developer

12/2018 - 08/2019

Seller's Place - Culver City, Ca

- Technologies: JavaScript, HTML, CSS, React.js, Express.js, MSSQL
- Constructed the front end of a web application that facilitated connections between event coordinators and potential vendors. Utilizing the designs provided by the business owner, I successfully implemented an intuitive and user-friendly interface, enhancing the overall user experience.
- Developed MSSQL stored procedures and API endpoints in Node.js and Express.js to optimize data querying processes.

## SKILLS

---

HTML, CSS, JavaScript, TypeScript, React.js, Next.js, React Native, Backbone.js, jQuery, Node.js, Express
